

ALPHABETICAL SUBJECT INDEX

Individual lectures or articles are indicated by single page numbers, Sessions by first and last page numbers

- Abstracting services in phot., 581
 Acknowledgements, xii, 642
 Adsorption of dyes on AgBr, 74
 Aerial photography, 331, 334, 338, 340, 343
 and economic development, 343
 requirements for, 340
 Aerial survey and mapping, *see* Photogrammetry
 Aesthetics of colour phot., 323
 Ageing of films, 32
 Agfa Copyrapid, 47
 Air flow, high speed phot. of, 364, 371
 Allyl thiourea, sensitizing by, 58, 89
 Alpha-emitters, nuclear track emulsions for
 studying, 435
 Anti-retarders, 37
 Apparatus for printing and processing, 230,
 466, 471, 477, 488
 Applications of photography, 215, 245,
 351-496, 619
 see also: Colour photography; High-speed
 phot. and cinematography;
 Kinematography; Nuclear track
 photography; Photomechanical pro-
 cesses; Photocopying
 Applied photography, books on, 589
 Art, colour phot. in the service of, 315
 Aurous thiocyanate, sensitizing with, 17
 Autoradiography, 417, 423
- Balzac and Nadar, 573
 Beam-splitting stereo-projection, 346
 Bibliography on applied phot., 589
 Bi-metal plates, 519, 522
 Biographies, 1, 559, 563, 573, 623
 Biological photography, 245, 423, 447-455
 training in, 619
 Blue-print processes, photochemistry of, 253
 Books on applied photography, 589
 Books illustrated with phot. prints, 580
 British Standards Institution, 643
 Bromine, desensitization by, 150
- Cameras, high-speed, 356, 377, 384, 393
 Cations, influence on fixing, 177
 Centenary of the R.P.S., 1
 Centenary Conference of the R.P.S.
 see Conference
 Chairmen of Conference Sessions, xvi
 Chemical sensitization, 13, 17, 37, 53-90,
 69, 83
 see also: Sulphur sensitizers
 Chromate ions, desensitization by, 150
 Chronograph for high-speed kinematog-
 raphy, 377
 City and Guilds of London examination,
 503, 607
 Classification of high-speed cameras, 393
 of phot. literature, 643
 Clayden effect, 122
- Collotype, reversal, 526
 Colour correction, 269-282, 286, 543, 547
 Colour densitometry, 233, 234
 Colour development, 283, 286, 297
 Colour kinematography, 283-312
 Colour masking, 269-282
 in graphic arts reproduction, 543, 547
 Colour materials and processes, 283-312
 Colour photography, 267-324
 aesthetics, 323
 applied, 267, 315, 455
 creative directions in, 323
 in practice, 313-323
 in the service of art, 315
 as a tool in research, 267
 Colour processes, 267-324
 Colour reproduction, fidelity, 269, 274, 286,
 543, 547
 photomechanical, 543-552
 Colour sensitometry, 277, 279
 Committee of Honour, xv
 Composite scenes, kinematography, 325
 Conference, R.P.S. Centenary, ix-xvii, 625-
 646
 Dinner, 638, 639, 641
 Contact copying in document reproduction,
 604
 Contents List, iii
 Contrast autoradiography, 425
 Contrast, influencing of, in printing, 488
 Converter for evaluating diffraction
 patterns, 215
 Correction of distortion, 334
 Crime detection, phot. in, 447, 449
 Crystal structure, influence on latent image,
 69, 110, 135, 141
 effect of X-rays on, 113
 Cyanine dyes, configuration, absorption,
 sensitization, 91, 99
- Daguerre's agent in America, 559
 Densitometer, a new reflection, 233
 Densitometry, 215-244
 during development, 161
 with photomultipliers, 240
 Desensitization, 103, 135, 141, 150
 Detonations, high-speed phot. of, 366
 Developability, influence of pressure on, 141
 Developed image, properties of, 145, 181-214,
 292, 305, 412, 417, 488
 Developer classification and formulae, 228
 Development, effect on nuclear tracks, 441
 infectious, 441
 influence on granularity, 189
 kinetics, 155, 161, 165, 169
 reproducible, 230, 466, 471
 rôle of oxidation products, 160
 for sensitometry, 230, 466, 471
 super-additivity in, 165, 169
 uniform, by gas burst agitation, 471

- Diazo processes, 535, 597, 601, 604
 Dichroism, 145
 Diffraction in half-tone negatives, 517
 Diffusion of dissolved silver salts, 47
 of dyes in gelatin, 298
 of light in emulsion layers, 181
 in multilayer colour process, 286
 of radioactive gases in emulsions, 445
 Digestion of phot. emulsions, 65, 79, 563
 Dinner, Conference, 638, 639, 641
 Direct positives, 47, 452
 Direct-shadow photography, 371
 Distortion in air survey cameras, 334
 by glazing, 493
 Document reproduction, 553, 601, 604
 methods, choice and costing, 597
 see also: Duplicating processes
 Documentation of photography, 581-596
 Dot structure, 511
 Duplicating processes, 535-542, 553
 Dye-forming development, 283, 286, 297
 Dye sensitization, *see* Optical sensitization
 Dyes, diffusion in gelatin, 298
 fading, 309
 sensitizing, *see* Sensitizing dyes

 Early photographers, 1, 559, 567, 573
 Education and training in photography, 503, 607, 611, 616, 619
 Effects, photographic, 83, 122, 128, 145-154
 see also: Clayden effect; Herschel effect;
 Inter-image effect; Regression effect
 Ektalith, 604
 Electro-dialysis, 86,
 Electronic scanning in stencil duplicating, 540
 Electrons, influence of range on phot.
 effects, 117
 track length and grain number, 117
 Emulsion technology, 13-52, 65, 79, 563
 metal sensitization in, 13
 Emulsions, photographic, history, 563
 Endothermic compounds, photochemical
 effects, 248, 250
 Examinations, *see* Training
 Excited states of alpha-emitters, 435
 Excursions during the Conference, 636, 637,
 639
 Exhibitions during the Conference, 634
 Explorers and early photography, 567

 F.A.5 lamp, 455,
 F.I.D./C77, 643,
 Fading of dyes in gelatin, 309
 Fading of latent image, 125
 of proton tracks, 427
 Fédération Internationale de Documenta-
 tion, 643
 Fidelity of colour reproduction, 269, 274,
 286, 543, 547
 Film show of the Conference, 634
 Finance of the Conference, 642
 Fixation, 173, 177
 Fluorescence photography, 449
 Fluoroscopy, industrial, 409
 Fog, 79
 ageing, 32
 inhibitors, 42

 Forensic photography, 447, 449
 Foreword, ix
 Fox Talbot, 623, 636, 637, 639
 Fulminate of silver, 250

 Gamma radiography, 405
 Gelatin, 22, 37, 42, 65, 79, 83, 86, 89, 99,
 298, 305, 309
 in silver halide grains, 22
 General problems in photomechanical
 work, 503-510
 Glazing, distortion by, 493
 Gloss of phot. papers, 211
 Gold sensitization, 13, 17
 Gouraud, Daguerre's agent in America, 559
 Grading of colour negatives, 274
 Grain size, 184, 196
 Graininess, 181
 Granularity, 181, 189
 variation with area of scanning spot,
 184
 Graphic arts, impact of phot. on, 497
 Group portrait of the Conference, xvii

 Halation, 203
 Half-tone reproduction, 511, 517, 529
 Harmonic prints, 488
 Herschel effect, 83, 122, 128
 High-speed cameras, 356, 377, 384, 393
 classification 393
 High-speed cinematography 356-402
 assessing information, 388
 in the United States, 384
 High-speed photography from 1935 to 1953,
 356
 in the study of moving fluids, 360
 High-speed photography and kinemato-
 graphy, 356-402
 High-speed spectroscopy, 462
 History of photography, 1, 107, 257, 331,
 338, 351, 356, 384, 403, 457, 497, 529,
 559-580, 559, 567, 573, 575, 623
 Hydroxyl ions, adsorption, 53
 Hygro-photography, 245

 Illumination, even, of sensitometric strips,
 220
 Illustration of books by actual phot. prints,
 580
 Illustrations, list of, viii
 Image, properties of the developed, 181-214
 Images, spectral neutrality, 196
 Imperial College of Science and Technology:
 Readership in phot., 616
 Incubation effect on latent image, 135
 Industrial photography, 384, 489
 Industrial radiology, 403
 Informal gathering and Dinner, 636
 Infra-red radiation, effect on latent image,
 128
 Institute of British Photographers, examina-
 tions, 607
 Joint Committee I.B.P.—R.P.S., 616
 Institute of Photography, proposal for, 575
 Intaglio half-tone, 529
 Interchangeability of colour phot. materials,
 283

- Inter-image effects, 286
 Internal combustion engines, phot. of, 489
 International Federation for Documentation, 643
 International Scientific Film Association Congress, 636
 Iodine azide reaction, 89
 Iron salts, complex, photoconductivity, 253
 Kinematograph, electronic high-speed, 377
 Kinematography, 325-330
 see also: Colour Kinematography; High-speed phot. and kinematography
 Kodachrome film: use of Photoflood lamps, 317
 Kodak Research Laboratories, 257, 484, 643
 Kodak tropical research laboratory, 484
 Laboratories, phot., 257, 484
 Lacock Abbey, 636, 637, 639
 Latensification, 58
 Latent image fading, 128, 150, 427
 formation and theory, 53, 58, 69, 79, 83, 107-144, 107, 110, 113, 117, 122, 128, 135
 history of theory, 107
 topography, 122
 Lecture Committee of the Conference, xvi
 Lecture Sessions of the Conference, 631
 Lenses, 334, 340
 Light distribution in the phot. layer, 203
 Light-sensitive materials, preparation, 13-52, 65, 79, 563
 Light sources, 216, 317, 455
 Lippmann emulsions, 145
 Literature of photography, 581-595
 Map making, 340, 343
 Masking for colour correction 269, 274
 in colour reproduction, 543, 547
 Matrices, relief height measurement, 305
 Medical photography, 447-456
 training in, 609, 619
 Members of the Conference, 649-656
 Mercurio-silver iodide emulsions, 245
 Microcopying, 493, 553
 Microdensitometer, 300
 Microdensitometry, 184
 Microphotography as a research tool, 493
 Microphotometer for nuclear tracks, 430
 Monckhoven's contribution to phot. emulsions, 563
 Multilayer materials, properties of, 283-312
 Museum of Photography, proposal for, 575
 Nadar, 573
 Neutral images in colour sensitometry, 279
 Non-silver halide processes, 245-256, 298, 305, 535, 537, 601
 Nuclear track emulsions, 48, 122, 128, 417
 in biology, 423
 for detecting excited states, 435
 for discriminating between charged particles, 441
 diffusion of gases in, 445
 photometry, 430
 Nuclear track photography, 427-446
 Objectives, photographic, 334, 340
 Offset processes, 519-528
 Opening of the Conference, 629
 Optical sensitization, 7, 90-106
 Organizing Committee of the Conference, xv
 Other applications and techniques, 457-496
 Paper as emulsion support, 49
 Patrons of the Society and the Conf., xv
 Personalities of the Conference, xv-xvi
 Phenidone developer, 165, 169
 Photoconductivity of complex iron salts, 253
 Photocopying, 553, 597-605, 597, 601, 604
 Photoelectric scanning for contrasty reproduction, 495
 Photoengraving and subsidiary processes, 511-518
 Photoengraving, training in, 503
 Photoflood lamps, photometry, 317
 Photogrammetry, 331-345
 British contributions to, 331
 since 1849, 338
 Photographic effects, 83, 122, 128, 145-154
 see also: Clayden; Herschel; Inter-image; Regression effect
 Photographic lenses, 334, 340
 Photographic literature, 581, 589
 Photographic schools, 609
 Photographic science, 7-266
 Photography in crime detection, 447, 449
 in the graphic arts, 497
 history of, 1, 107, 257, 331, 338, 351, 356, 384, 403, 457, 497, 529, 559-580, 623
 with nuclear track emulsions, 417, 423, 427-446
 in the service of science, 496
 of test motors, 489
 training in, 503, 607, 611, 616, 619
 tropical research on, 484
 in the Universities, 611, 616
 Universal Decimal Classification of, 643
 Photogravure, 529-534
 Photolithography, 519-528, 535
 Photomechanical processes, 497-552
 classification of, 644
 Photometry of nuclear tracks, 430
 of Photoflood lamps, 317
 Photomultipliers, densitometry with, 240
 Photo-typesetting, 506
 Planographic processes, 535
 Polarized exposure, influence on dichroism, 145
 Polyvinyl alcohol emulsions, 37
 Potassium hydride, sensitization by, 110
 Preface, xi
 Preparation of the Conference, 627
 Preparation of light-sensitive materials, 13-52, 65, 79, 563
 Presidential Addresses, 7, 267, 351, 497, 553
 Presidents of the Sections of the Conference, xv
 Pressure effect on latent image, 135, 141
 Printing from colour negatives, 274
 Printing frame, 488
 Prints, harmonic, 488
 photographic, as book illustrations, 580
 Proceedings of the Conference, 625-646

- Processing, 47, 155-180, 228, 351, 441, 466
 rapid, 477
- Progress Medal, presentation of, 638, 639
- Projection, stereo, 346
- Properties of the developed image, 145,
 181-214, 292, 305, 412, 417, 488
 multilayer materials, 283-312
- Proton tracks, latent image fading of, 427
- Protractor method in medical phot., 451
- Public Lectures, 257, 323, 496, 623; 632
- Radiography, 403-426
- Radiology, industrial, 403
- Rapid processing, 477
- Receptions during the Conference, 636
- Reciprocity law, 286
- Regression effect, 125
- Relief heights, measurement, 305
- Report on the Conference Events, 629
- Research on photography, 257, 484
- Research, microphotography as a tool for,
 493
 photography in the service of, 267, 496
- Resolution in autoradiography, 417
 of half-tone images, 511
 testing in radiography, 412
- Resolving power, 181, 201
 of colour films, 292
- Restrainers, 42
- Retinal photography in colour, 455
- Retrospect and Prospect, 644-646
- Reversal, 47, 452
- Reversal collotype, 526
- Reversal material, 35mm, in medical phot.
 452
- Ripening accelerators, 37
 chemical, of emulsions, 79, 86, 563
see also: Chemical sensitization
- Royal Photographic Society, history, 1
 Centenary Conference, ix-xvii, 625-646
 R.P.S.—I.B.P. Joint Committee 616
- Sabattier effect, 122
- Scanning, photoelectric, for increasing the
 contrast, 495
- Schlieren photography, 371
- School of Medical Photography, London, 607
- Schools for photography, 609
- Sensitivity, theory, 32, 69, 135, 141
see also: Chemical sensitization;
 Optical sensitization
- Sensitization by pressure, 135
- Sensitizing dyes, 91, 99, 103
 adsorption of, 99
- Sensitometry, 215-244
see also: Colour sensitometry
- Sessions of the Conference, 631
see also: Contents List
- Sharpness, 181
 of colour films, 292
- Silk screen stencils, preparation of, 537
- Silver bromide sols, 58
- Silver halides, gelatin in, 22
 precipitation of, 26
- Silver nitride, photochemistry, 250
- Social Committee of the Conference, xvi
- Social Events during the Conference, 636
- Spectral neutrality of silver images, 196
- Spectral sensitivity, influence of pressure on,
 141
- Spectrography, 457, 462, 466, 471
- Spectroscopy, high-speed, 462
 photography in, 457, 466, 471
- Sprays, high-speed phot. of, 361
- Standard light sources for sensitometry, 216
- Stannous chloride, digestion and fogging
 with, 79
- Stencil processes, 535, 537, 540
- Stereo-projection, 346
- Stripping film autoradiography, 425
- Structure of the developed image, 181
- Subtractive colour processes, 283-322
- Sulphur sensitizers, 37, 58, 65, 79, 83, 86, 89
see also: Chemical sensitization
- Talbot, W. H. Fox, 623, 636, 637, 639
- Technique and applications of photography,
 351-496
- Theory of development, 155-176
 of fixing, 173, 177
 of processing, 155-180
 of the photographic process, 50 years
 of work on, 257
see also: Latent image theory
- Thermofax process, 557
- Thermo-sensitive layers, 245
- Thickness of the emulsion, influence on
 reflection and diffusion, 181, 203
 influence on resolving power, 201
- Thiourea, reaction with silver bromide, 74
- Time-table of the Conference, 631
- Tone reproduction by the half-tone process,
 511
- Track autoradiography, 425
- Track-histophotographic method, 423
- Training in medical and biological photo-
 graphy, 609, 619
 for photoengraving, 503
 in photography, 607-622
- Transfer processes for duplicating, 553
- Travelling matte, 325
- Tropical phot., research on, 484
- Type composition, phot., 506
- Ultra-violet photography, 449
- Universal Decimal Classification, Section
 77 Photography, 643
- Universities, photography in, 611, 616
- Unsharp mask, printing frame, 488
- Ursilber, 173
- Vanadium salts, development by, 161
- Visitors from other Societies, 632
- Visits during the Conference, 634
- Wedge, sensitometric, cast gelatin, 224
 with positive and negative scales, 226
- Weigert effect, 145
- Windsor Castle, excursion to, 638
- X-ray diffraction patterns, evaluation, 215
- X-rays, photochemical and photographic
 effect, 110, 113, 117
- Xenon lamp for colour phot., 455
- Xerography, 557
- Xero-radiography, 410

INDEX OF LECTURERS, CO-AUTHORS AND SPEAKERS

Numbers in *Italics* indicate the page numbers for Lectures, in normal type those for Discussion Remarks, and in **bold type** those for Speeches, etc.

- Abridat, M., 26, *177-180*
 Adams, R., 522, 525
 Aguiton, R., *317-321*
 Albouy, G., *435-440*, 440
 Ammann-Brass, H., *17, 17-21*, 21
 Axford, A. J., *169-172*, 172

 B.S.I., 643
 Baby, P., *196-200*, *317-321*
 Baines, H., 36, 640
 Ballard, A. E., *173-176*, 176
 Beeson, E. J. G., 455, 455
 Belcher, E. H., *240-244*
 Bennett, W. F., *466-470*, 470
 Berchtold, Jean, *250-252*
 Berg, W. F., 26, *107-110*, 112, 127, 144
 Berger, H., *277-279*, 279, 285, 314
 Bernet, A., *441-444*
 Berry, C. R., *113-115*, 116
 Blum, J., 116
 Boer, D., 314, 630
 Bourne, B. P., *53-57*, *58-64*
 Bowler, S. W., 401
 Braive, M. F., *573-575*
 Brauer, E., 160
 Braun, W., *122-126*
 Brentano, J. C. M., 116, 215
 Brock, G. C., 337
 Brooker, L. G. S., *91-98*
 Brown, R. J. T., 330
 Bruno, M. H., *522-525*, 526

 Cackett, F. G., 516, 522
 Cardew, P. N., 448, 521, 454, 455
 Carroll, B. H., 36, 69, *99-102*, 102, 106, 116, 127, 144, 176
 Cartwright, H. M., 505, 510, *511-516*, 516
 Chastel, R., 134, 416, 434, 440, *441-444*, 444, *445-446*
 Chateau, H., *26-31*
 Chesterman, W. D., *356-359*
 Chilton, L. V., 579, 587, 588, *616-618*, 622
 Chorine, N., 46
 Chouet, J. P., *317-321*
 Clare, W. G., 316
 Clark, W., 470, *484-487*, 516, 540, *553-558*, 578, 579, 580, 587, 588, 595, 600, 604, 605, 643, 644
 Coates, A. C., *184-188*
 Coleman, S. J., *607-610*, 622
 Conrad, R., *547-551*, 551
 Coote, J. H., *313-314*, 314
 Courtney-Pratt, J. S., 383
 Cox, R. S., *511-516*
 Crabtree, J. I., *477-483*
 Cricks, R. H., 314, 330
 Crowther, R. B., 587, 588
 Croxson, C., *403-411*, 411
 Cruset, J., 316, 337, *338-340*, *340-342*, 342, 345
 Cüer, P., 48, 73, 127, *128-134*, 134, 416, *423-425*, 425, 446

 Dalladay, D. B., *466-470*
 David, R., *334-337*, 337
 Davis, P., *22-26*, 26
 Debot, R., 64, 140, 188, *189-195*
 den Hartog, H., 411
 Dent, S. G. jr., *91-98*
 Devaux, P., *377-383*
 de Waele, A., *535-537*, 539
 Dewhurst, H., *346-350*
