

INDEX

This index is restricted to proper names and covers the main text and the picture captions but not the footnotes. Page numbers of picture captions are given in italics.

Buildings and institutions are grouped under town, city or state (e.g. most Mackintosh buildings are listed under Glasgow). Churches are always listed under their town or city. Where a geographical reference would include only a single building, this is given instead under its own name (e.g. Maison Coilliot, Lille). Where it has seemed useful to provide them, cross-references have been given from architects to the main locations under which their buildings are listed.
